ALUMNI/AE FELLOWS AND THEIR ADDRESSES

The following list of former GFD Fellows has current or last known addresses in condensed form. Many are probably retired even though not listed as such. Please send any known updates to me at george.veronis@yale.edu, and I'll update the file.

*The list contains each year with the total number of fellows for that year between (); and in **red**, the number of women for that year followed by the total number up to and including that year. For recent fellows the institution name in [] indicates still in graduate school. The last line for each year contains the type of position (academic, government lab or private industry) for the total number of fellows for that year. At the end is the total number of fellows, the total number of women fellows and the total number of American women fellows. At the very end is the short list of alumni whose addresses are not known.*
