

| Topic | Date | Instructor |
|----------------|--------|---------------------------------|
| MATLAB | 12-Jul | Ariel Chouchana |
| Python | 14-Jul | Megan Gillen |
| Pre-calc | 19-Jul | Noah Germolus |
| Calculus I | 21-Jul | Liam Moser |
| Calculus II | 23-Jul | Katy Abbott |
| Linear Algebra | 28-Jul | Lukas Lobert |
| ODE I | 2-Aug | Brendan O'Neill/Jesse Pelletier |
| ODE II | 4-Aug | Adrian Garcia |
| PDE | 9-Aug | Mason Rogers |
| Prob & Stats | 11-Aug | John San Soucie |

| Description |
|--|
| if-statements, for-loops, matrix operations |
| installation, syntax, matrix operations |
| algebra, transcendentals, trigonometry, vectors |
| integration and differentiation, Taylor series? |
| multivariate, Green's theorem, Gauss theorem, |
| matrix operations, matrix properties, eigenvalues/vectors |
| 1st & 2nd order linear ODE's |
| systems of ODE's |
| separation of variables, method of characteristics |
| standard deviation, Gaussian distribution, central limit theorem |
