Diversify Access to the Sea

Increased participation of and use by early-career researchers

Forging New Partnerships

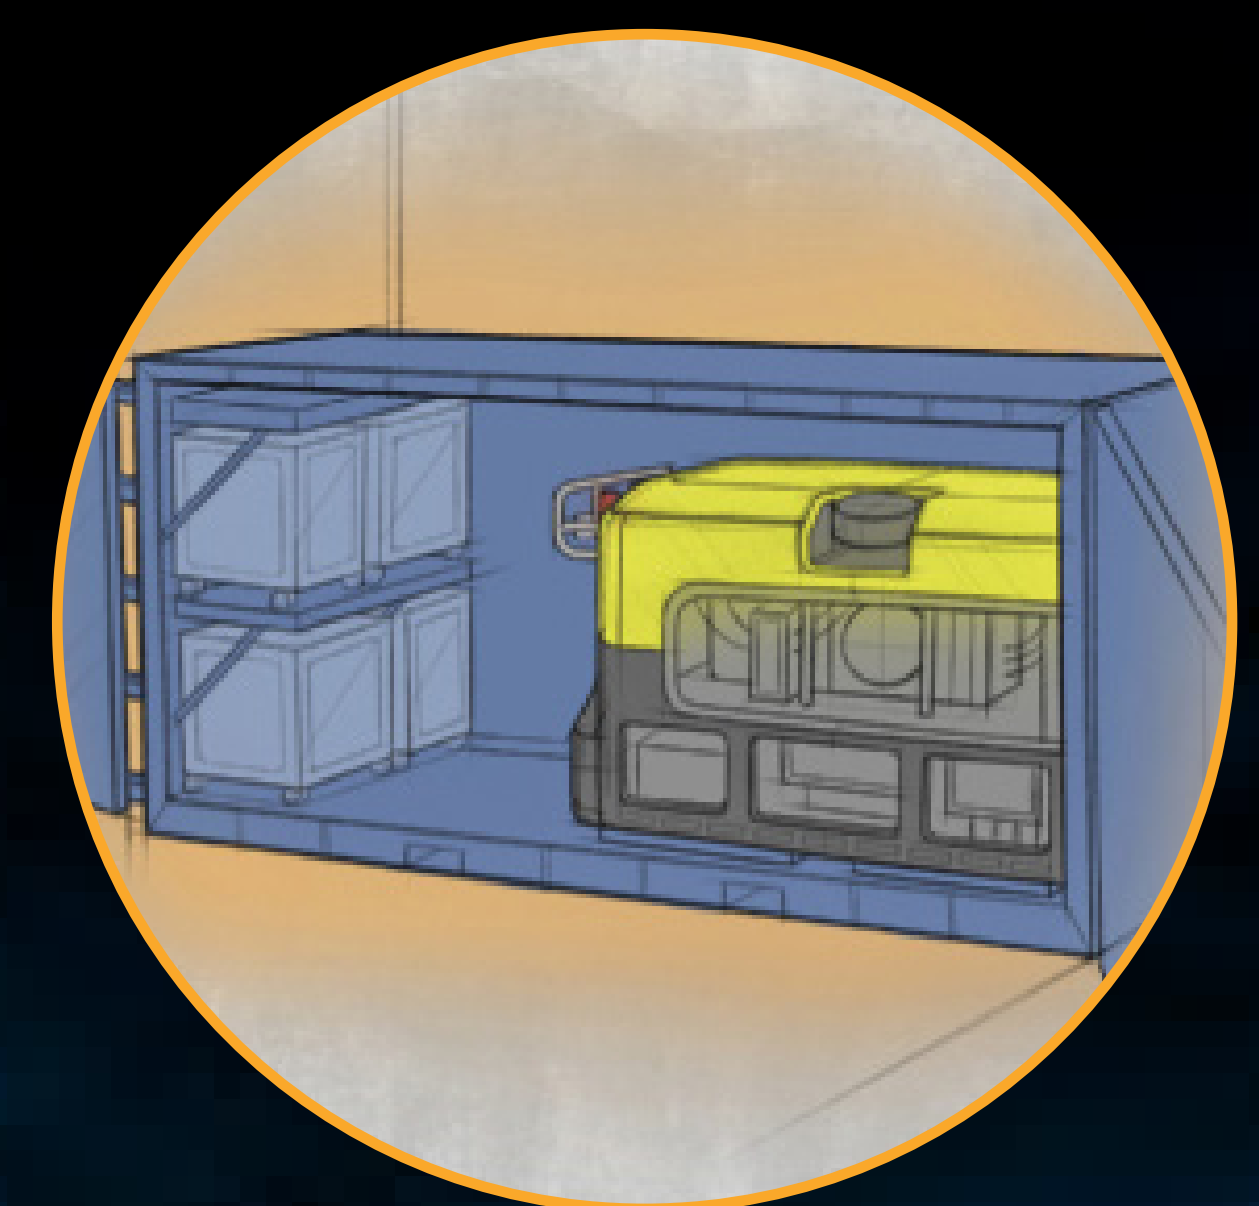

WHOI and Greensea IQ are partnering to deliver a robust and fully supported topside and software solution,

Remote: Operations, Monitoring and Component Lifecycle Management

mROV will incorporate an advanced and resilient system for long-range remote operations

Optimized Operational Model

mROV will ship in 2 standard 20 ft. containers and require only 1 container and a docking head on the vessel

WHOI's Pioneering Development of ROVs

mROV pulls from decades of operational experience, while leveraging the expertise and pedigree of JASON, the gold standard in deep ocean exploration and research.
